**DTS**

# Discover one of the largest, most advanced dental laboratories in the UK – **DTS International.**

**Dental Technology Services (DTS) International is one of the largest, most digitally advanced dental laboratories in the UK. They can offer you a vast range of restorations and materials along with a service that will make you smile.**

DTS has been active in the dental industry for over 60 years and this family run business has not only managed to move with the times but has even managed to set the pace by launching new techniques and products into the UK marketplace before anyone else. Each generation of the business has been dedicated to improving the dental industry as a whole as well as advancing DTS as a company.

## **Dental**

Over the years DTS has worked in every aspect of dentistry. Today through the experience and knowledge they have gained over the years, DTS can provide you with the following restorations:

- Attachments
- Custom Abutments
- Implants
- Implant Retained Dentures
- Chrome Partials
- Prosthetics & Orthodontics
- All-Ceramic Crowns and Bridges
- Private & NHS Crowns and Bridges
- Opalite®
- Veneers
- Inlays and Onlays

DTS is proud and privileged to work with some of the best technicians in the country especially within our implant department. For over 25 years DTS has specialised in implantology and the technicians who work for DTS are some of the most experienced in the country and they endeavour to provide you with the best aesthetic solution to your case.

## **Technology**

DTS aims to be at the forefront of dental technology by working closely with industry leaders to take dental technology and techniques to new heights and improve the UK dental industry as a whole. By working with industry leaders like 3M Espe, Nobel Biocare and more, the restorations DTS provides are some of the best in the country as they can offer you the latest advancements before anyone else, innovations such as implant retained dentures, Chameleon Veneers and Opalite®.

They also work closely with the industry leaders to help test and advance their technology so it is as good as it can be. If you'd like to know more about DTS and the technology they work with please visit [www.dts-international.com](http://www.dts-international.com).

## **Services**

DTS has always believed in tailoring its services to each individual dentist's needs. Although it's one of the largest dental laboratories in the UK, nothing is more important than delivering the best possible results.

As a laboratory DTS works in a unique way. They believe each department is specialised so each department operates as an independent lab - this allows each technician to focus on their specific goals and techniques. Each department communicates with each other and, with a combined administration team, the work is produced quickly, efficiently and to excellent high standards.

DTS has also developed a unique customer service offering and patient education programme which it offers as added value to you and your practice.

To find out about our Patient Education offering and more please visit [www.dts-international.com](http://www.dts-international.com).
